

Set-up for Copying records from other libraries (using z39.50)

Spectrum version 5.3

Reasons to set-up Z39.50

- ☐ Eliminate the need to hand enter titles into Spectrum
- ☐ No worries! – you will not need to fret over rules and formulate subject headings, etc.
- ☐ You can search other libraries without leaving the Spectrum catalog

See online list of libraries

- ☐ <http://targettest.indexdata.com/>
- ☐ Choose desired library
from the A-Z show targets on left
hand navigation
- ☐ Click on desired Library
- ☐ Host, Port, Database name and name
of the library is needed

Bib-1 Use attributes	12 access points: 4-5, 7-9, 12, 21, 54, 1003, 1007, 1016, 1031

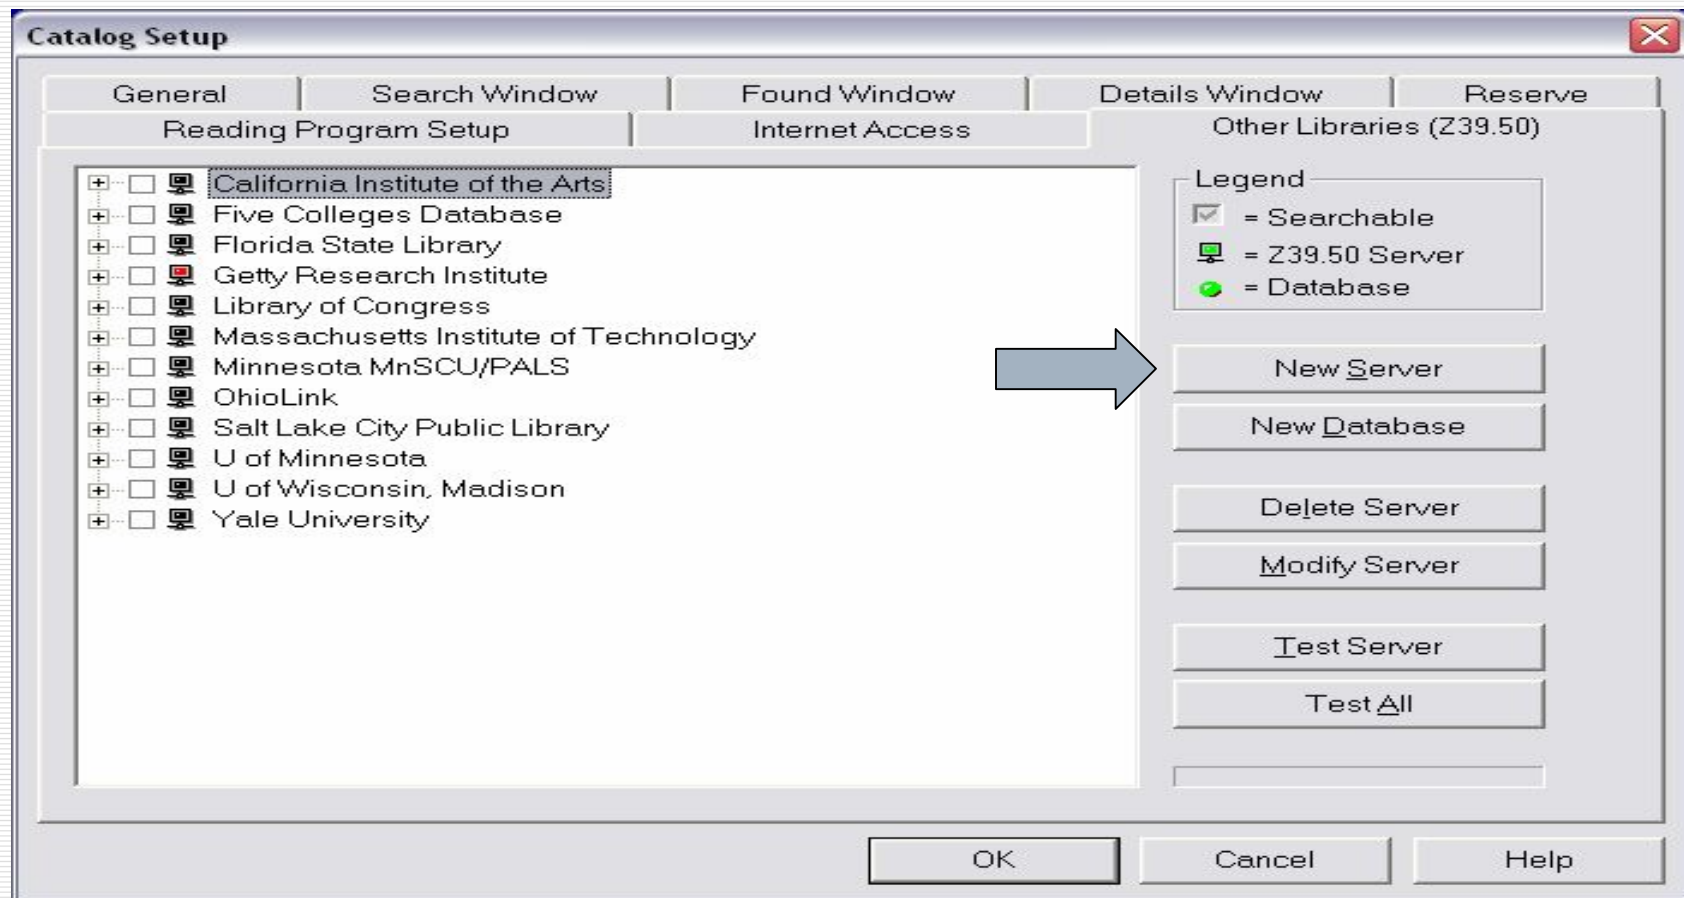

Done Internet

Add libraries to be searched

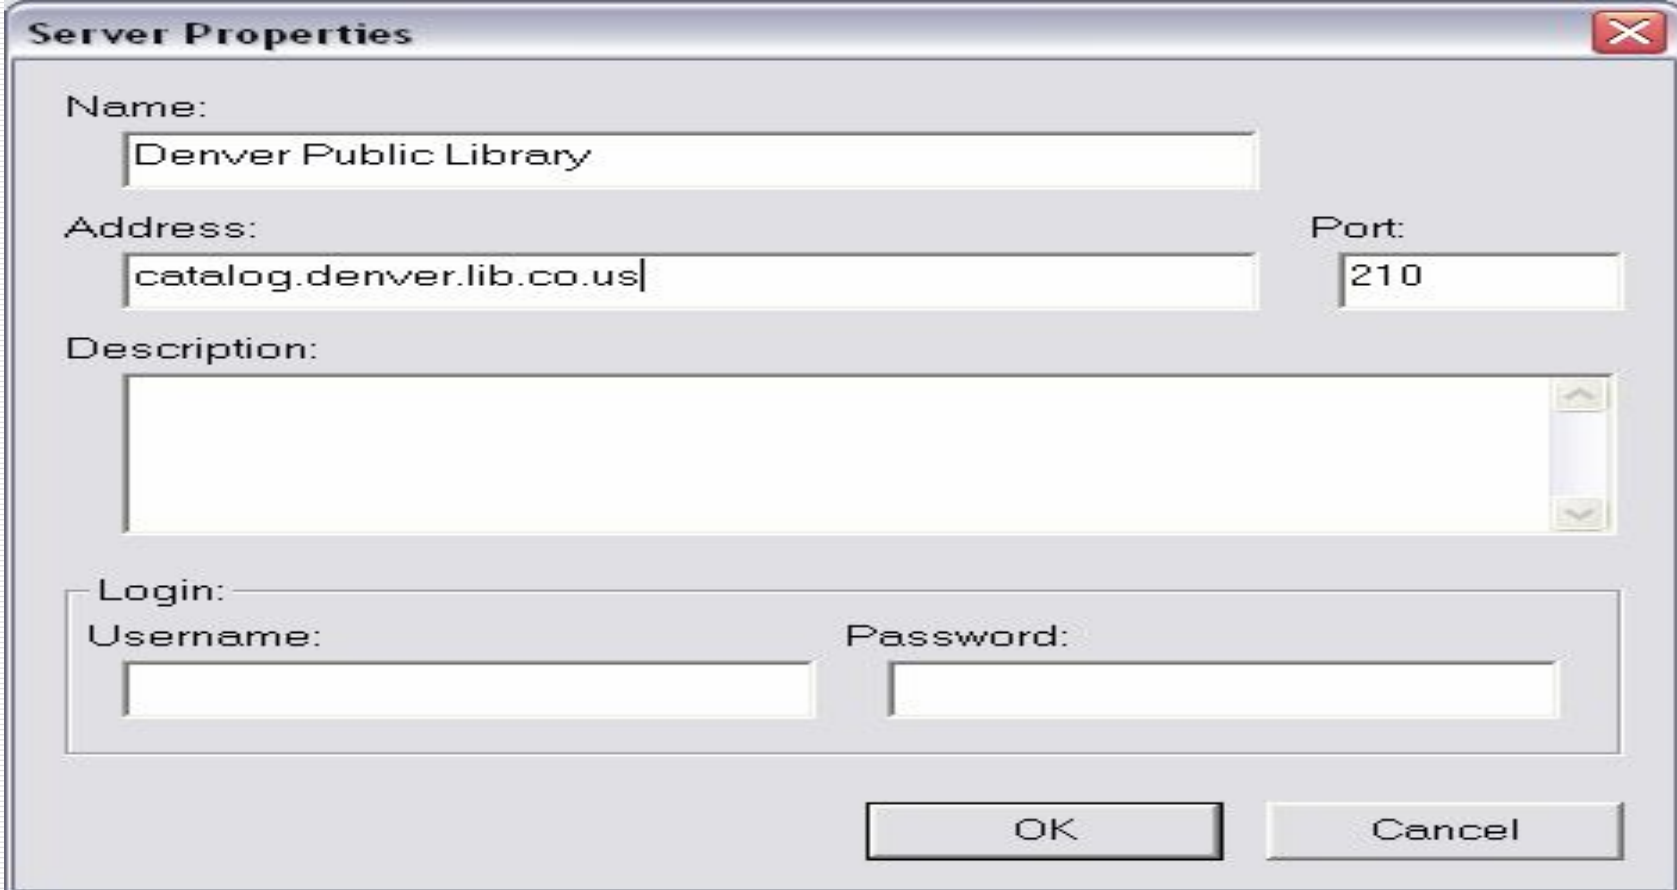

- ❑ Choose setup>Catalog>Other Libraries (Z39.50) tab

Choose "New Server"

Enter Name of library, host & port information then "ok"

Server Properties

Name:
Denver Public Library

Address: catalog.denver.lib.co.us Port: 210

Description:

Login:
Username: Password:

OK Cancel

Add Database Name and "ok"

A screenshot of a 'Database Properties' dialog box. The dialog has a title bar with the text 'Database Properties' and a close button (X) in the top right corner. Inside the dialog, there are two main sections. The first section is labeled 'Name:' and contains a text input field with the text 'DPL'. The second section is labeled 'Description:' and contains a large, empty text area with a vertical scrollbar on the right side. At the bottom of the dialog, there are two buttons: 'OK' and 'Cancel'.

Database Properties

Name:

DPL

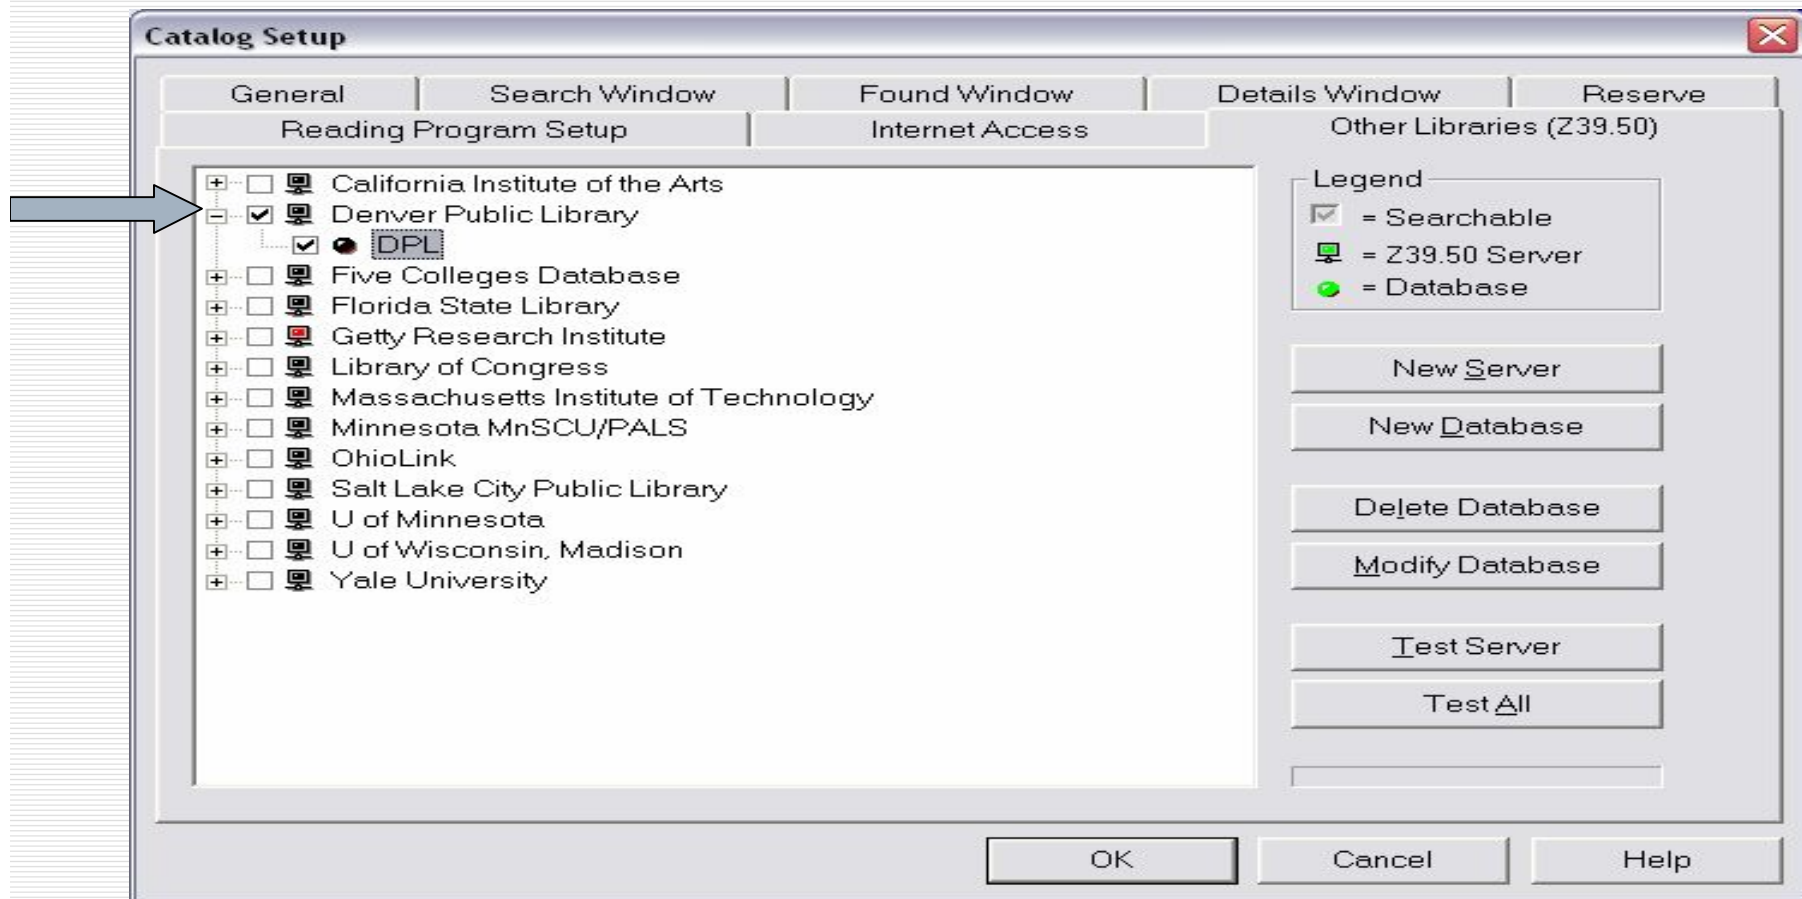

Description:

OK Cancel

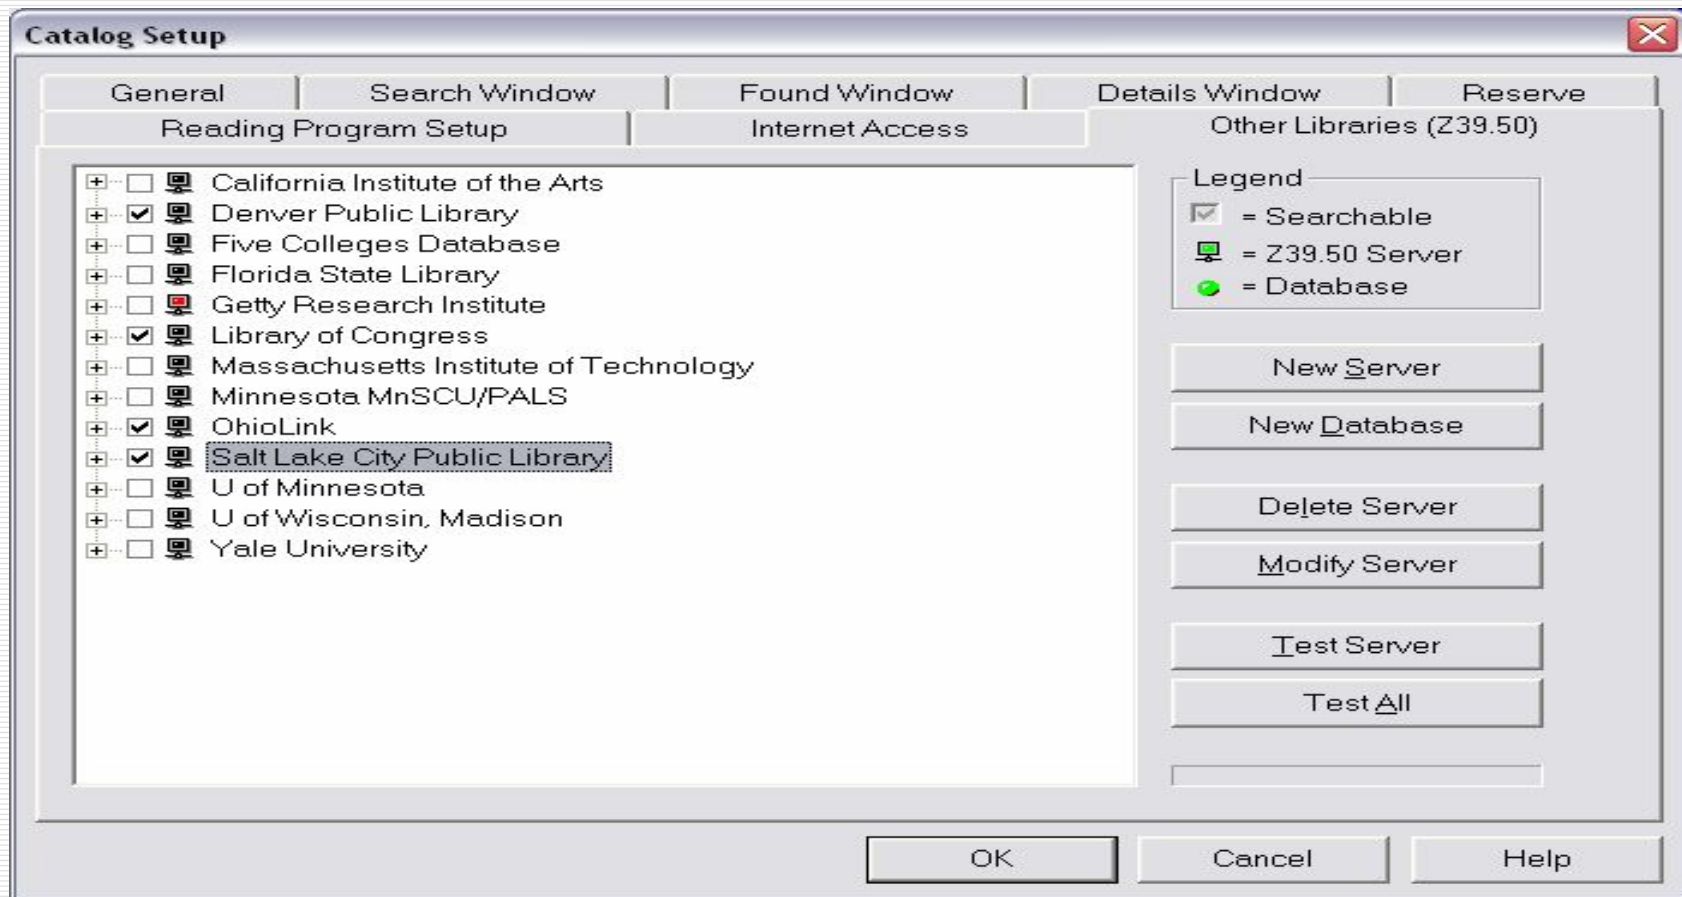

Click No

New library is now created – click “OK”

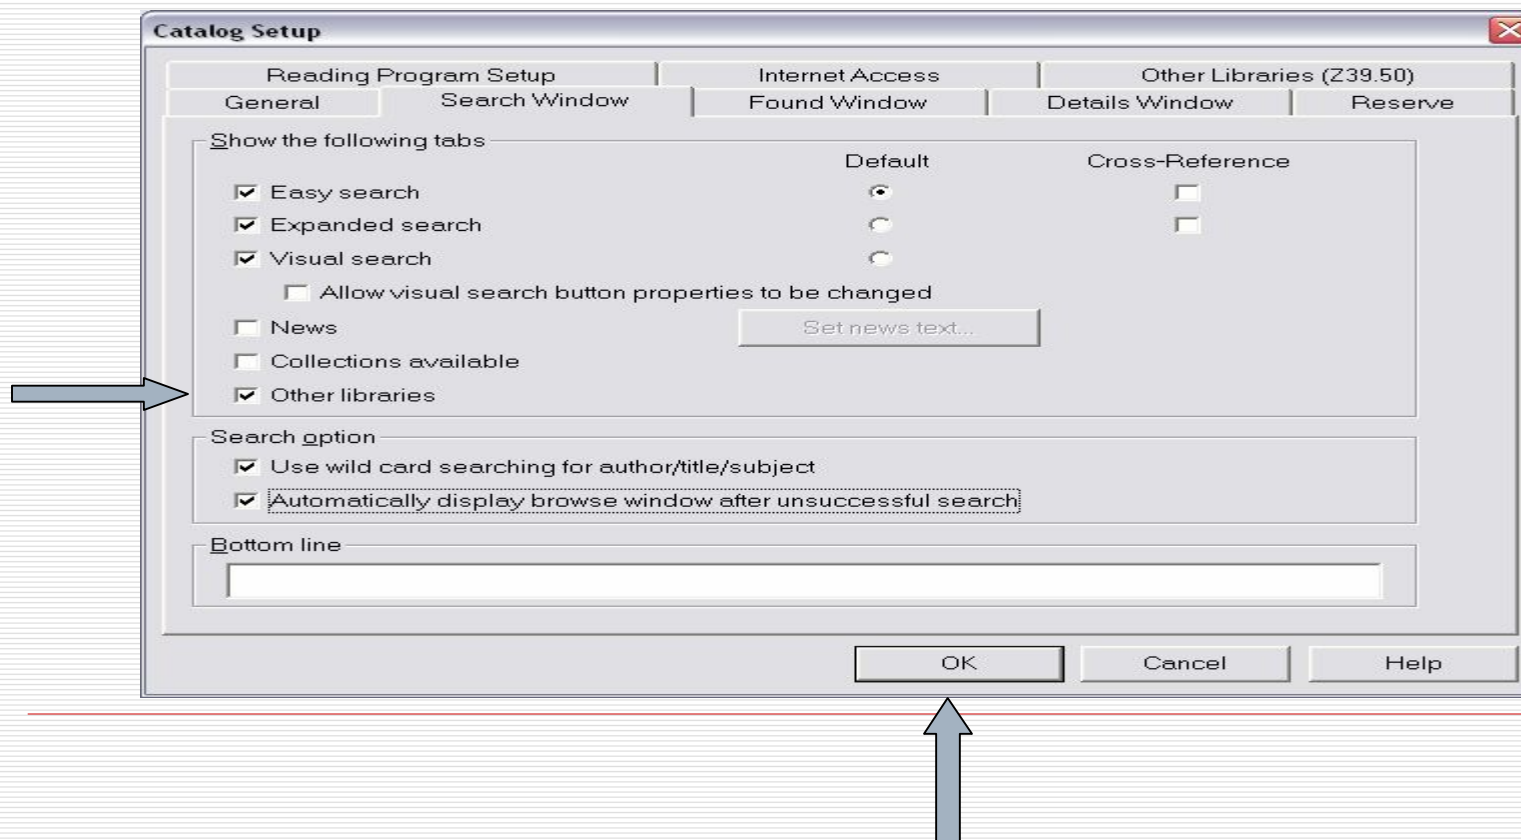

To make the libraries Searchable –
Click box in front of listing (✓ will
appear) & “OK”

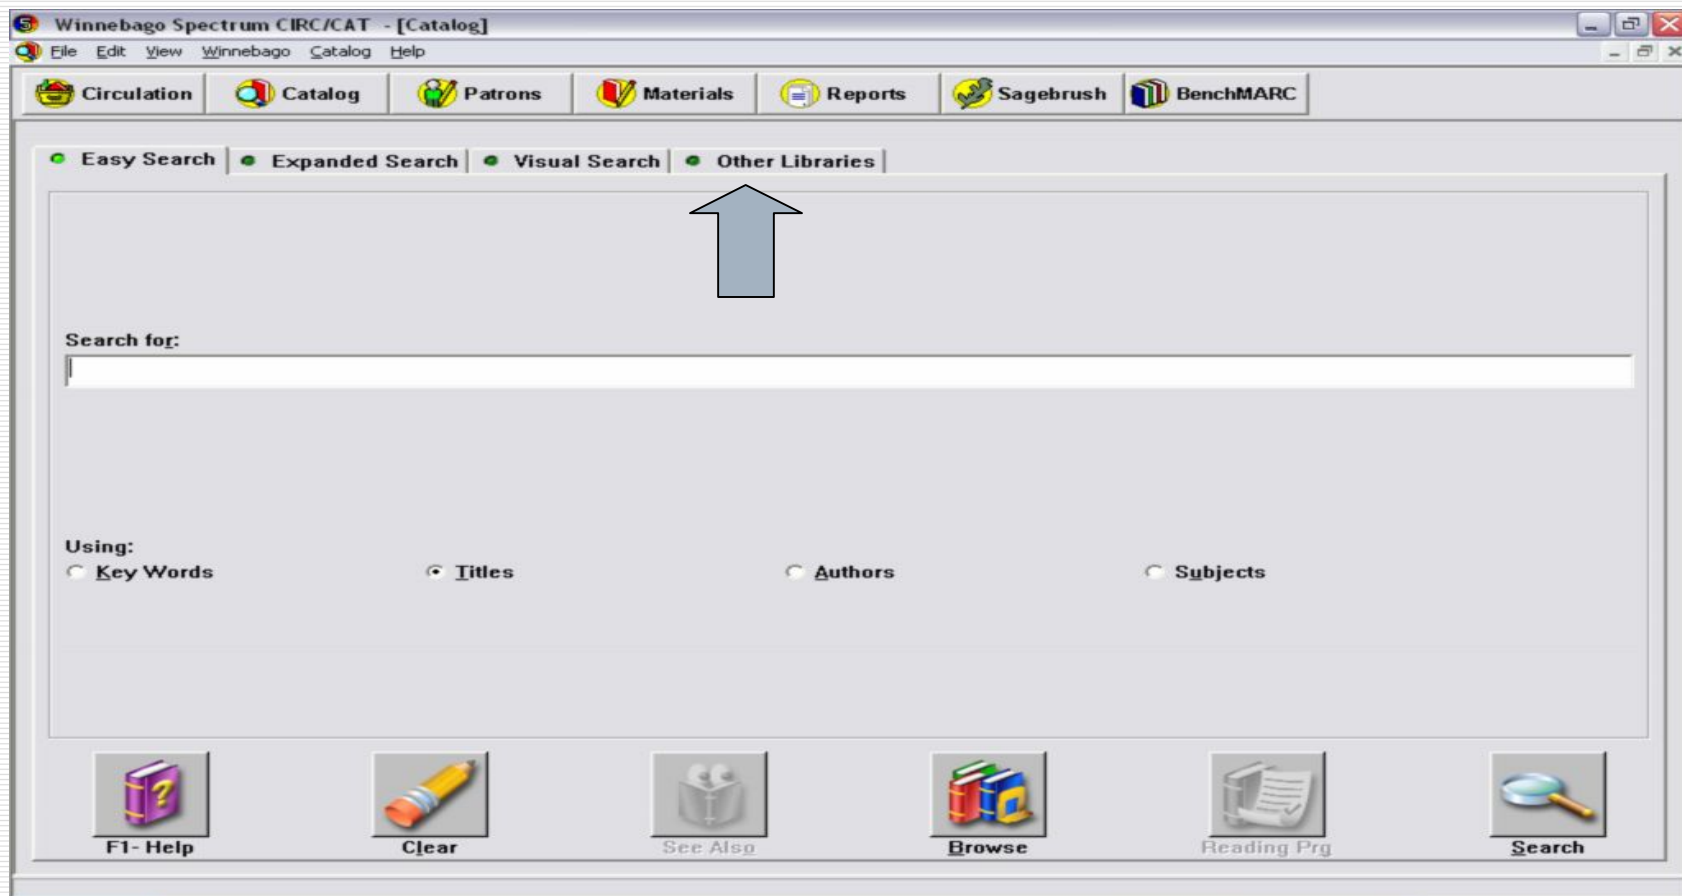

Add "other libraries" tab to your catalog search

- ❑ Choose Setup>Catalog>Search Window

Tab will now be displayed

Set-up is now complete

- ☐ After you have set up your libraries and the “other libraries” tab you are now ready to start searching titles
- ☐ You can add and/or delete new libraries at any time
